

Banking on Biology

Healthy Soil – Healthy People

A presentation by Graeme Sait , internationally acclaimed author and educator, on cutting edge research and strategies in **Biological Agriculture**.

Graeme (a New Zealander) is the founder of **Nutri-Tech Solutions**, an Australian company, providing comprehensive information and products for soil, animal and human nutrition. His inspirational vision for agriculture and human health has been documented in over 300 published articles and he is currently working on three new books. A much sought after, entertaining and informative speaker, Graeme has inspired audiences all over the world. He will be a key-note speaker at the Auckland “*Healthy Living Show* “ on Fri 2nd Nov.

Soil-Monitoring and Management

a scientific approach to working with nature, not against

Biological Agriculture	Values and nurtures soil organisms as a hidden workforce.
	Monitors and ensures mineral relationships
	Maximises fertiliser efficiency
	Increases productivity and profitability
	Uses nutrition for natural pest control
